

ICP Partners

FOR IMMEDIATE RELEASE: 1 February 2021

Boost for European property sector

Dublin, Ireland: GFL today launches its property and land finding division expanding and widening the base of services it offers to clients.

GFL takes over the current operations of ICP Partners, who have been operating services for clients across Europe for over 15 years.

The new division gives clients continued access to professional services across the EU market. Increasing confidence will inject some vitality into the property market and is welcome news for investors in an uncertain marketplace.

This addition to GFL services means that prospective clients across Europe reduce risk when buying property and commissioning building projects, with access to experienced, reliable and independent professional advice.
