

FOR IMMEDIATE RELEASE: 12 March 2021

Reducing risks in UK project delivery

Dublin, Ireland: GFL today launches its strategic alliance with AngusPM for targeted and dynamic project management to widen and strengthen its service offering to UK clients.

AngusPM brings thirty years of project management to the table; experience gained with some of the most prominent construction organisations globally.

This strategic alliance reduces risks in the procurement and planning of projects and stabilises project delivery in the current uncertain economic phase.

GFL now affords its UK clients access to specialist, in-depth and independent personal advice to manage the enhanced inherent risks of the current marketplace.
